Mockup Review Thoughts for Sarah:
-nice home page…
-overall the colors are relatively desaturated… i feel like a nice strong blue, red, or yellow would add some energy to the page, which is inherent to the plane
-i would maybe take away the landing page w different pages you could click to, and just include a menu button and have a navigation bar drop down
-i assume that none of these pages are scrollable
-i like the grainy treatment of the pictures
-the layouts look kind of static… it would be cool if there were multiple pics on some pages so not everything is gigantic and aligned to the right
-maybe a more relevant pic for comparable aircraft
-make grey darker
-make captions on hover
-make menu items white
